

Name _____ Date _____

LANDFORMS & BODIES OF WATER CONCENTRATION

HOW TO PLAY

The cards on the following page show 16 different landforms and bodies of water. Write the definition of each one on the blank cards on page 3. Then, cut out all of the cards. Turn them face down and mix them up. Arrange them face down in a square formation.

Turn over two cards at a time. If the two cards you turn are a picture of a landform or body of water and its matching definition, keep them face up. If not, turn them face down again. Continue turning over two cards at a time until you match every landform and body of water to its definition.

CHALLENGE:

Pair up with a partner, and use a stopwatch or clock to time yourselves. Whoever finishes matching the cards first wins!
